# Brokerage & Private-Bank Transfer Value Ranking

---

A weighted, after-tax scoring of where to move \$1,000,000 to \$2,000,000 of appreciated, in-kind assets for the largest **total** economic package, not the biggest headline cash bonus.

## Executive Dashboard

The composite weights net after-tax cash (30), recurring lending and card value (25), cash and CD yield (15), hold and clawback flexibility (15), tier perks and service (10), and negotiability (5). The headline-cash leader does not win the total-value crown; a relationship tier does, because recurring mortgage, HELOC, and card value compounds for a leveraged operator.

## Best Picks by Investor Segment

The winner changes with how you will actually use the assets. Cash-max chasers, property bundlers, and margin borrowers should not transfer to the same institution.

**Pure cash maximizer:** **Robinhood Gold** > Public.com > SoFi Invest

Robinhood Gold 2% match delivers \$24,000 after tax at \$2M; the trade is a 5-year lock plus Gold membership.

**Mortgage / loan bundler:** **Merrill Edge / BofA Premier** > J.P. Morgan / Chase Private Client > Charles Schwab

Merrill / BofA Premier tier at \$1M unlocks a 75% card-rewards boost, a 0.25% mortgage-rate reduction, and a 0.625% HELOC discount; recurring value compounds every year you hold property.

**Active margin trader:** **Robinhood Gold** > Public.com > Fidelity

Interactive Brokers is the lowest ongoing cost of capital at roughly 4.8% versus 6.75% at Robinhood; on a \$500k debit that is about \$9,750 saved per year. Robinhood Gold is the bonus-adjusted alternative if you commit to the 5-year hold.

### What \$1,000,000 unlocks

- **BofA / Merrill Premier tier:** 75% credit-card rewards boost, 0.25% mortgage-rate cut, 0.625% HELOC discount, dedicated team.
- **Chase Private Client:** negotiated mortgage pricing, relationship banking, waived fees.
- **Schwab & Fidelity:** private-client desks, competitor-offer matching, priority service.
- **Robinhood & Public:** uncapped percentage match; every incremental \$100k earns \$2,000 or \$1,000 respectively.
- **Interactive Brokers:** tier does not gate anything; the edge is a structurally lower margin rate.

## Top Institution Profiles

The leaders split cleanly: Robinhood and Public win on raw match, Merrill and Chase on relationship and lending value, Fidelity on flexibility and yield. Read the card verdicts against your intended use of the assets.

Net After-Tax Transfer Cash at \$1M and \$2M

After-tax figures apply the 40% marginal assumption to pre-tax bonuses. Robinhood and Public scale linearly with assets, so their \$2M bars are double their \$1M bars; flat-cash offers cap out.

# Scoring Visualizations

Two views of the same model: the heatmap shows every institution across all six weighted dimensions, and the radar isolates the three composite leaders so their trade-offs are legible.

Darker navy is a stronger dimension score (0 to 100); Robinhood and Public own cash, Merrill and Chase own recurring value and perks, Fidelity and IBKR own yield and flexibility.

The headline-cash leader (Robinhood) spikes on a single axis; the total-value leader (Merrill) covers more area across the weighted criteria.

## Appendix A • Scoring Model and Weights

Every score below is reproducible from the arithmetic shown. The composite is the weighted sum of six dimension scores, each on a 0 to 100 scale.

### Weight table

| Dimension                   | Weight     | Rationale                                                                             |
|-----------------------------|------------|---------------------------------------------------------------------------------------|
| Net after-tax cash          | 30         | Absolute after-tax dollars; the direct prize. Normalized to the best offer.           |
| Recurring lending / card    | 25         | Annualized mortgage, HELOC, and card value; compounds yearly for a property operator. |
| Cash / CD yield             | 15         | Sweep and CD yield edge at the \$1M to \$2M cash level.                               |
| Hold & clawback flexibility | 15         | Shorter hold and softer clawback rank higher; a 5-year lock is penalized.             |
| Tier perks & service        | 10         | Private-client tier, dedicated service, platform depth.                               |
| Negotiability               | 5          | Whether the offer can be negotiated upward at this asset level.                       |

**Tax treatment.** Brokerage transfer bonuses are ordinary income, reported on Form 1099-MISC or 1099-INT, per IRS Publication 525. All after-tax figures apply a 40% combined marginal rate; override the rate and every after-tax number scales linearly. Move securities **in-kind** via ACATS so no position is sold and no capital gain is triggered by the transfer itself; only the cash bonus is taxable.

Annualized after-tax yield = after-tax bonus divided by the hold period in years, expressed on the \$2M base. It lets a \$5,000 / 12-month offer be compared against a \$40,000 / 60-month offer on equal footing.

### Segment weighting

Cash maximizer: cash 60, yield 15, hold 15, negotiability 10. Mortgage bundler: recurring 50, perks 20, cash 15, negotiability 15. Margin trader: yield 35, recurring 25, cash 25, perks 15, with an explicit overlay for cost of capital where Interactive Brokers leads.

**Verification legend.** LIVE means confirmed active on the retrieval date. VERIFY means the structure is credible but the exact \$1M to \$2M value, hold, or negotiated tier could not be confirmed from a public page and should be checked directly. CLOSED means expired. No offer in the scored league is presented as current unless marked LIVE.

**Method and independence note.** Rendering engine WeasyPrint; charts built with matplotlib in the Milhem Group palette; model computed in Python with all arithmetic exposed. This pass deliberately diverges from a wide comparison-grid layout, uses a scorecard and dashboard language, and surfaces uncapped percentage-match offers that a flat-cash screen tends to miss.
